SUKRUTH S

Bengaluru, Karnataka | +91 7019861312 | sukruths18@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building web applications, backend services, REST APIs, data pipelines, and machine learning solutions using **Java, Python, TypeScript, JavaScript, React.js, Flask, Quarkus, and SQL**, with relational and NoSQL databases. Skilled in **API design, service integration, real-time applications, OpenSearch, semantic/vector search, API testing, performance optimization, data processing, and ML workflows**. Strong foundation in **object-oriented programming, data structures and algorithms, database design, Git, GitHub Actions, and CI/CD**.

EXPERIENCE

Trumetric.ai | Bengaluru
Graduate Engineer Trainee Oct 2025 - Present

- Built frontend features using **Payload CMS, TypeScript, and React.js**, integrating web interfaces with backend services and **REST APIs**.
- Implemented backend components with **Java 21 and Quarkus**, applying object-oriented design, modular architecture, and API integration patterns.
- Reduced **OpenSearch query latency** by nearly 50% through query optimization, performance tuning, and bottleneck analysis, improving application responsiveness and observability.
- Captured **business-required analytics across 4 key areas** - query latency, zero-result trends, usage metrics, and search-quality signals - through REST APIs and database-backed workflows for reporting and product insights.
- Contributed to **real-time collaborative workflows using WebSockets, Y.js, and Redis-backed messaging**; worked with synchronized state and dependency validation.
- Worked with **document ingestion, chunking, embedding models, vector search/indexing, and vector databases** using OpenSearch.

XCEL Corp | Bengaluru
Full Stack Python Intern Nov 2024 - May 2025

- Implemented backend functionality with **Python and Flask**, integrated **MySQL** data stores, and validated REST APIs using Postman.
- Refactored existing **React interfaces and backend services**, applying maintainable coding and scalable patterns to achieve a **15% improvement in page load times** for key user flows.

Zidio Development | Bengaluru
Full Stack Web Development Intern Jul 2024 - Oct 2024

- Implemented a full-stack job portal using **React.js, Node.js, Express, and MongoDB**, applying REST-based workflows and frontend-backend integration.

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, SQL
Frontend: React.js, HTML5, CSS3, Payload CMS
Backend & APIs: Flask, Django, Quarkus, Node.js, Express.js, REST APIs, RESTful Services, API Design, JSON
Databases, Search & Vector: MySQL, PostgreSQL, MongoDB, Redis, OpenSearch, SQLite, Embeddings, Embedding Models, Document Chunking, Document Indexing, Vector Search, Vector Indexing, Semantic Search, RAG
Data Engineering & ML: Pandas, NumPy, scikit-learn, ETL, Data Ingestion, Data Transformation, Data Cleaning, Data Analysis, Machine Learning
Testing, Integration & DevOps: API Testing, Postman, Debugging, Troubleshooting, WebSockets, Y.js, Webhooks, Git, GitHub, GitHub Actions, CI/CD
Core: Object-Oriented Programming, Data Structures & Algorithms, HTTP/HTTPS, Database Fundamentals, Performance Analysis, Modular Design, Real-Time Systems

PROJECTS

- **ProMentor Platform** - Delivered a full-stack mentorship platform with Flask backend APIs and React.js frontend, implementing authentication, mentor listings, and session booking.
- **Pharma Intelligence & Data Analytics Pipeline** - Processed **250K+ medicine records across CSV, JSON, and Parquet** using Pandas, NumPy, and SQL/MySQL for data cleaning, transformation, aggregation, and analytics workflows.
- **Student Performance Analysis using Machine Learning** - Built a regression workflow to predict math scores, comparing 6 algorithms across 4 metrics (MAE, MSE, RMSE, and R^2); applied OneHotEncoder and StandardScaler, trained/evaluated models, and selected Linear Regression as the final model based on R^2 performance.

EDUCATION

Bachelor of Engineering in Computer Science & Engineering | 2021 - 2025 | CGPA: 8.53

CERTIFICATIONS

- Microsoft Learn - Introduction to GitHub Actions
- HackerRank Python (Basic) Certification
- Google Cloud Arcade - hands-on labs and challenges using GCP services
